

 SHOP SIZE- 20 SQM/215 SQF

ICE CREAM SHOP

DESIGN HIGHLIGHT

The project is situated in the heart of the city and aims to create an ice cream shop that immediately stands out as a landmark. The concept envisions a vibrant, eye-catching space, visible from afar, designed to attract passersby while remaining welcoming and inviting. Every design choice is focused on highlighting the true star of the space: the gelato. The interior layout is carefully planned to support a fast **grab-and-go** service, ensuring smooth flows and a seamless experience for both customers and staff.

VIRTUAL TOUR

Discover our virtual environments: **explore in 3D the spaces designed for you**, experience immersive engagement, and make confident decisions. **Find the right inspiration** to create a tailor-made, innovative, and unique venue.

Virtual Tour

MOODBOARD

The architecture and interior design interact with the urban context through geometries inspired by the **classical aesthetics** of the 1960s, combined with **reflective materials** that enhance the overall presence. The **distinctive** and **fancy** color palette—**white**, evoking purity and brightness, and **metallic pink**, a vibrant contemporary tone—adds character and originality. The harmonious interplay of these colors amplifies the visual impact, creating a striking and **memorable identity** for the venue.

FLOOR PLAN

Located in the **heart of the city**, the project features a compact and functional layout designed for **fast grab-and-go** service, typical of **high-traffic urban contexts**. Behind the sales area, a small laboratory supports daily production.

The choice of **display cases** with gelato in full view creates an immediate **visual impact**, enhancing the colors and textures of the product and **capturing the attention** of passersby.

LAY-OUT

This project demonstrates how a small footprint can be transformed into a highly efficient and welcoming space. Located in the heart of a **large city**, the gelato shop unfolds within just **20 sqm/ 215 sqf** — a format designed for quick service and **high urban traffic**, guided by targeted design choices and smart commercial strategies **tailored to the metropolitan context**.

The interior layout has been carefully studied to optimize every centimeter. The **display cases**, showcasing **24 flavors**, ensure **maximum product visibility** while providing the operator with simple and direct access. The compact yet well-organized back area includes a large professional sink and a station dedicated exclusively to coffee, completing a practical, functional, and at the same time **captivating environment**.

FURNITURE LIST

Furniture list - front counters:

- 1-Checkout counter
- 2-Gelato - Ice cream Display 12 flavors
- 3-Gelato - Ice cream Display 12 flavors
- 4-Neutral counter with drawer

Furniture list - back counters:

- 5-Back counter Coffee machine
- 6-Back counter sink
- 7-Back counter Three doors refrigerated

1 - CHECKOUT COUNTER

- Stainless steel frame
- 1 Stainless steel drawer
- 1 Stainless steel shelves
- Front panels made galvanized steel
- Plinth coated made galvanized steel

The checkout counter, with a **fully stainless steel frame**, is designed to ensure efficiency and organization in any operational setting. Equipped with **large stainless steel drawers and shelf**, it offers a durable, hygienic, and functional solution for space management. The Silestone[®] Cosentino surface guarantees long-lasting performance and easy cleaning, while the **front panels**, made of powder-coated galvanized steel with **high-resistance finishes**, complete the structure by combining strength with essential aesthetics.

3M

DI-NOC™

3M™ DI-NOC™ Architectural E-Series PO Polyolefin Film are film surface finishes that give you a range of choices as you pursue your sustainability goals. These films are made with approximately 99.5% non-PVC (non-vinyl) materials, and do not contain more than 0.5% of a polyvinyl chloride-based component. **These finishes are available in various patterns and textures – wood, plaster, concrete and more, and are a great way to upgrade your interior look without all the disruption.** 3M™ Comply™ Adhesive technology virtually eliminates air bubbles, simplifying and speeding up the application process.
