

 SHOP SIZE- 40 SQM/430 SQF

PASTRY SHOP

Project for a pastry shop located in the city center, conceived as a dynamic and welcoming space. **Articulated aesthetic** elements and **decorative details inspired by cake doilies** and the world of pastry-making, reinterpreted in a contemporary way as light textures and graphic patterns.

The graphic motif rises from a two-dimensional surface and takes shape as the **coffee counter upstand**, enriched with bronze-colored inlays that enhance its materiality and visual presence. Beyond defining the project's identity, this element conceals the **coffee preparation area** and integrates seamlessly with the counter, combining **function** and **formal continuity**.

VIRTUAL TOUR

Discover our virtual environments: **explore in 3D the spaces designed for you**, experience immersive engagement, and make confident decisions. **Find the right inspiration** to create a tailor-made, innovative, and unique venue.

Virtual Tour

MOODBOARD

A design approach focused on **integrating the counter within a broader and cohesive interior system**, where each element contributes to building a **unified** and **recognizable** identity. The counter, finished in **metallic pink**, becomes the focal point of the space and reinterprets the traditional **cake doily pattern**—an iconic element of pastry-making—transforming it into a **contemporary graphic feature**.

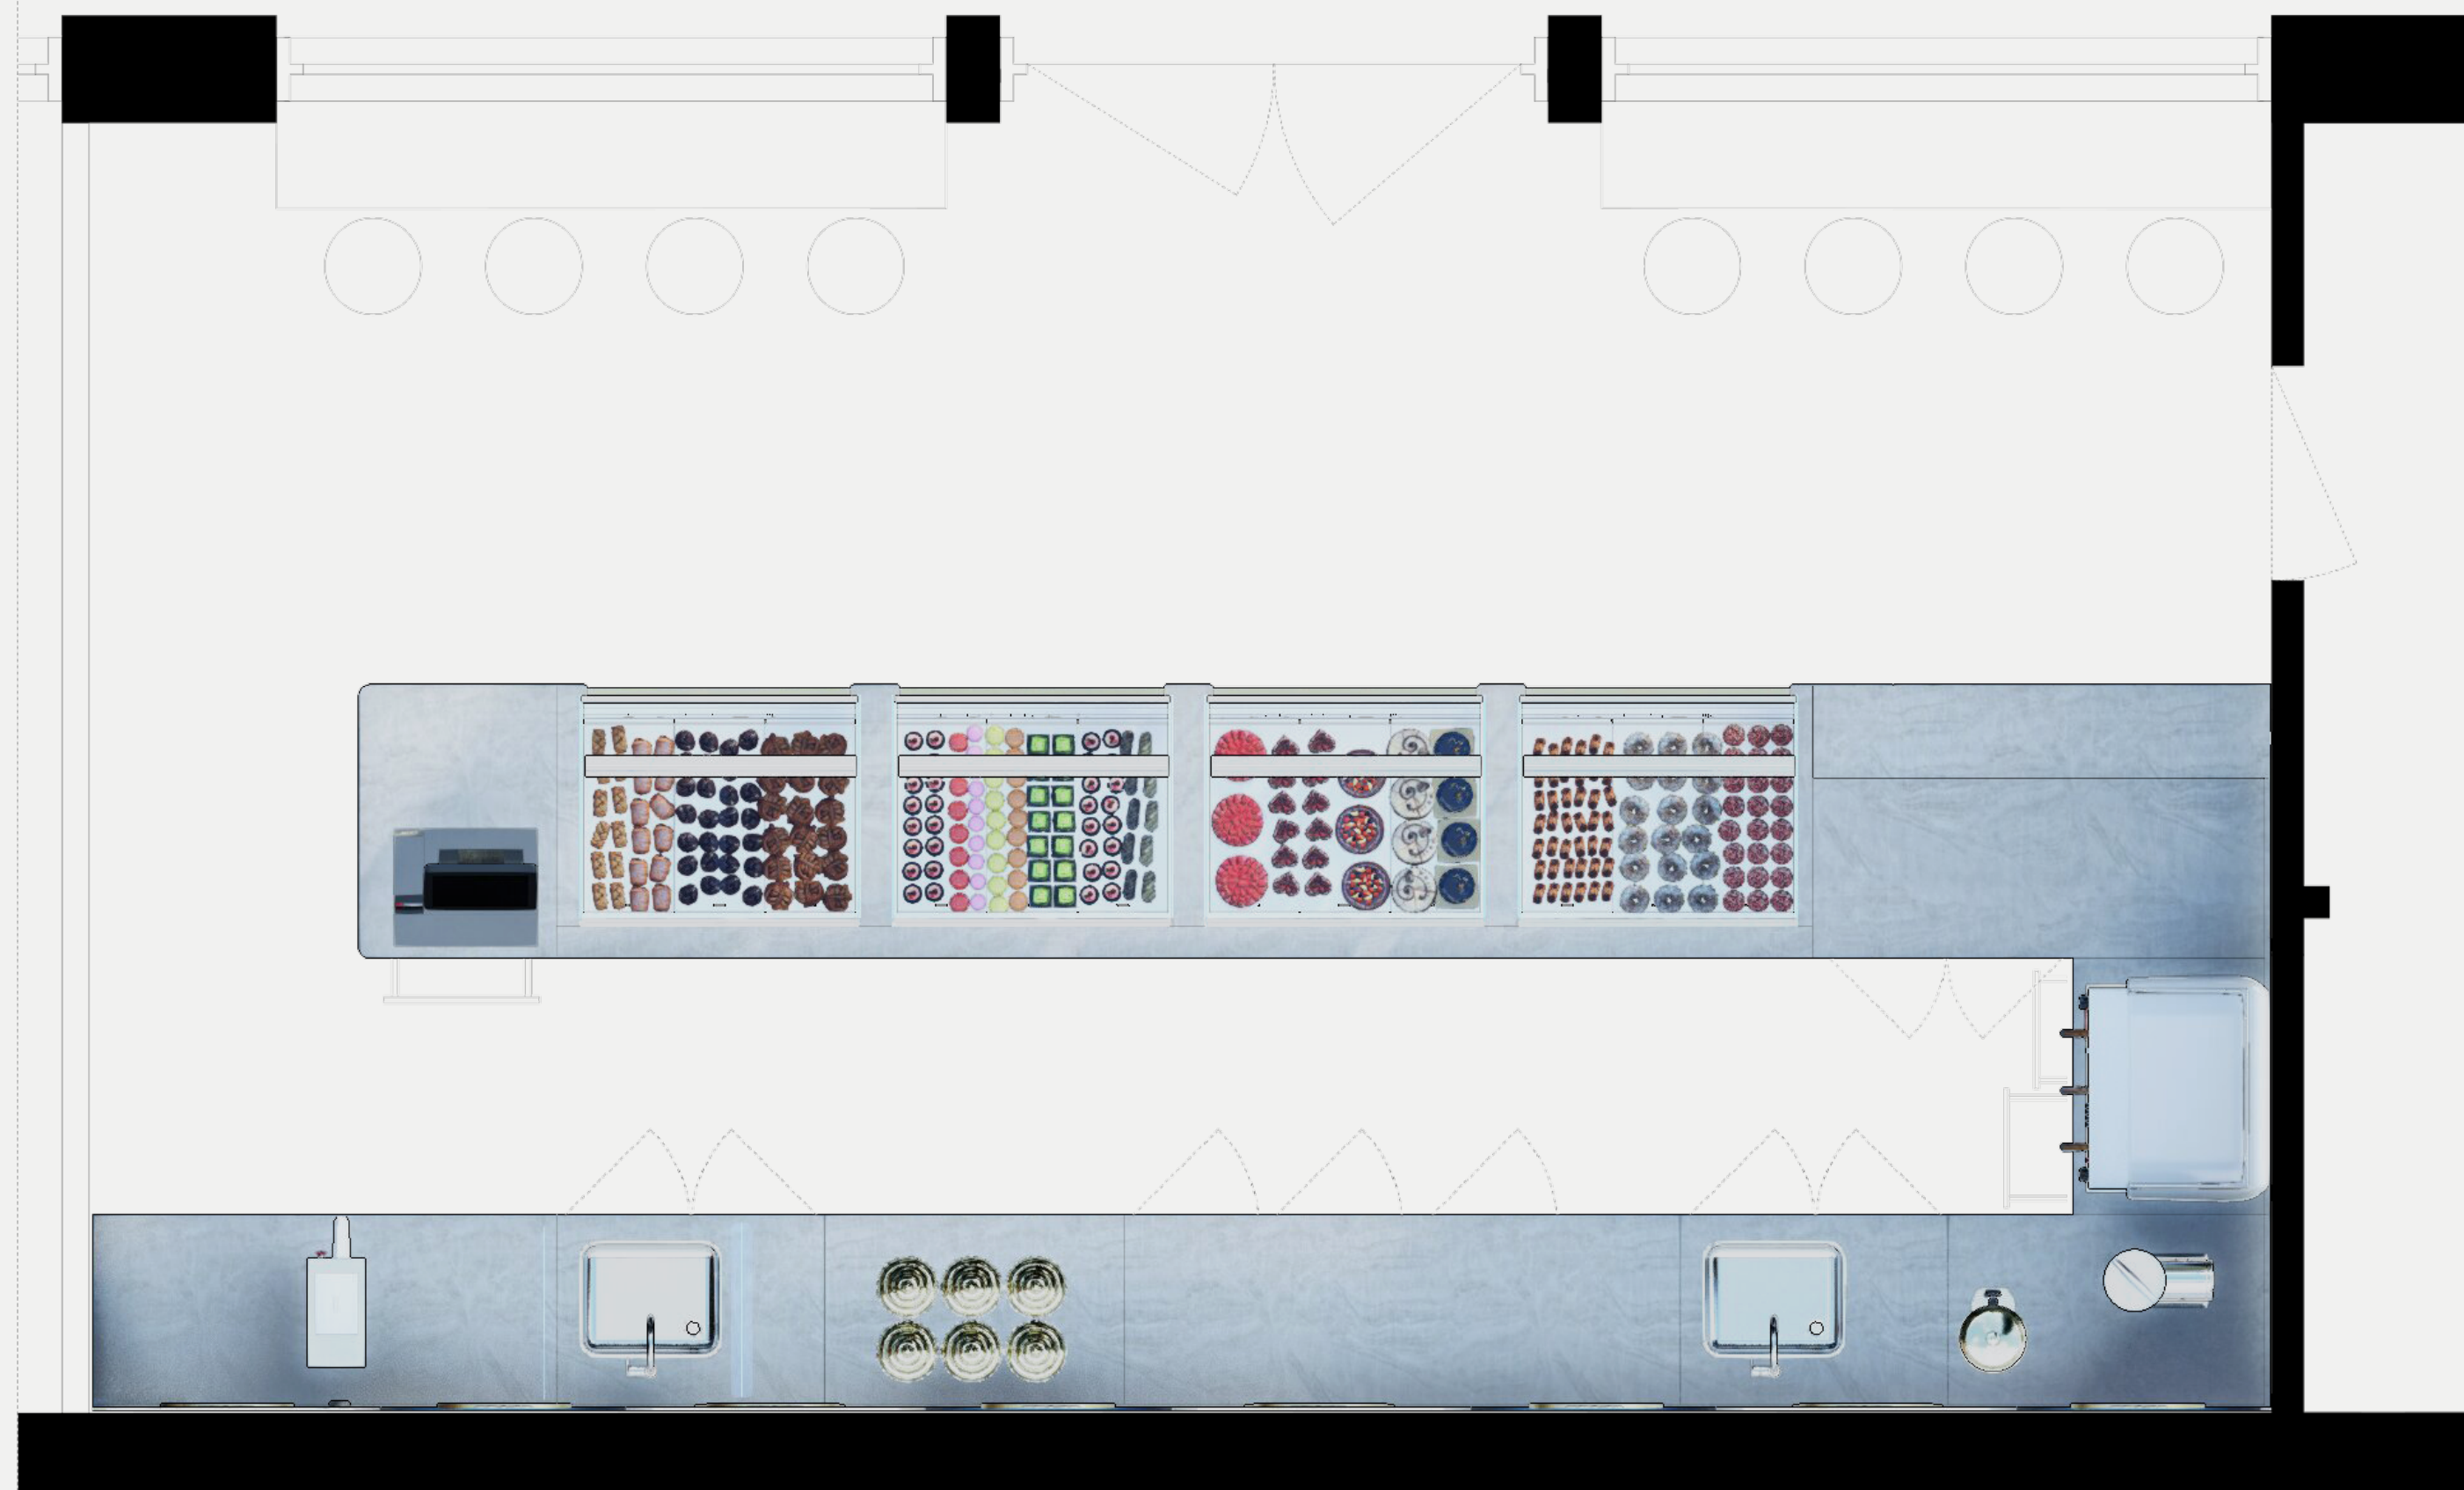

Behind it, a geometric backdrop of interwoven arches and circles creates a decorative pattern in shades of **gold, blue, rose** and **bronze**, adding depth and visual rhythm. The same double-arch motif is echoed in the glazing of the laboratory, which is directly visible from the display area, reinforcing formal continuity and strengthening the dialogue between production and retail.

FLOOR PLAN

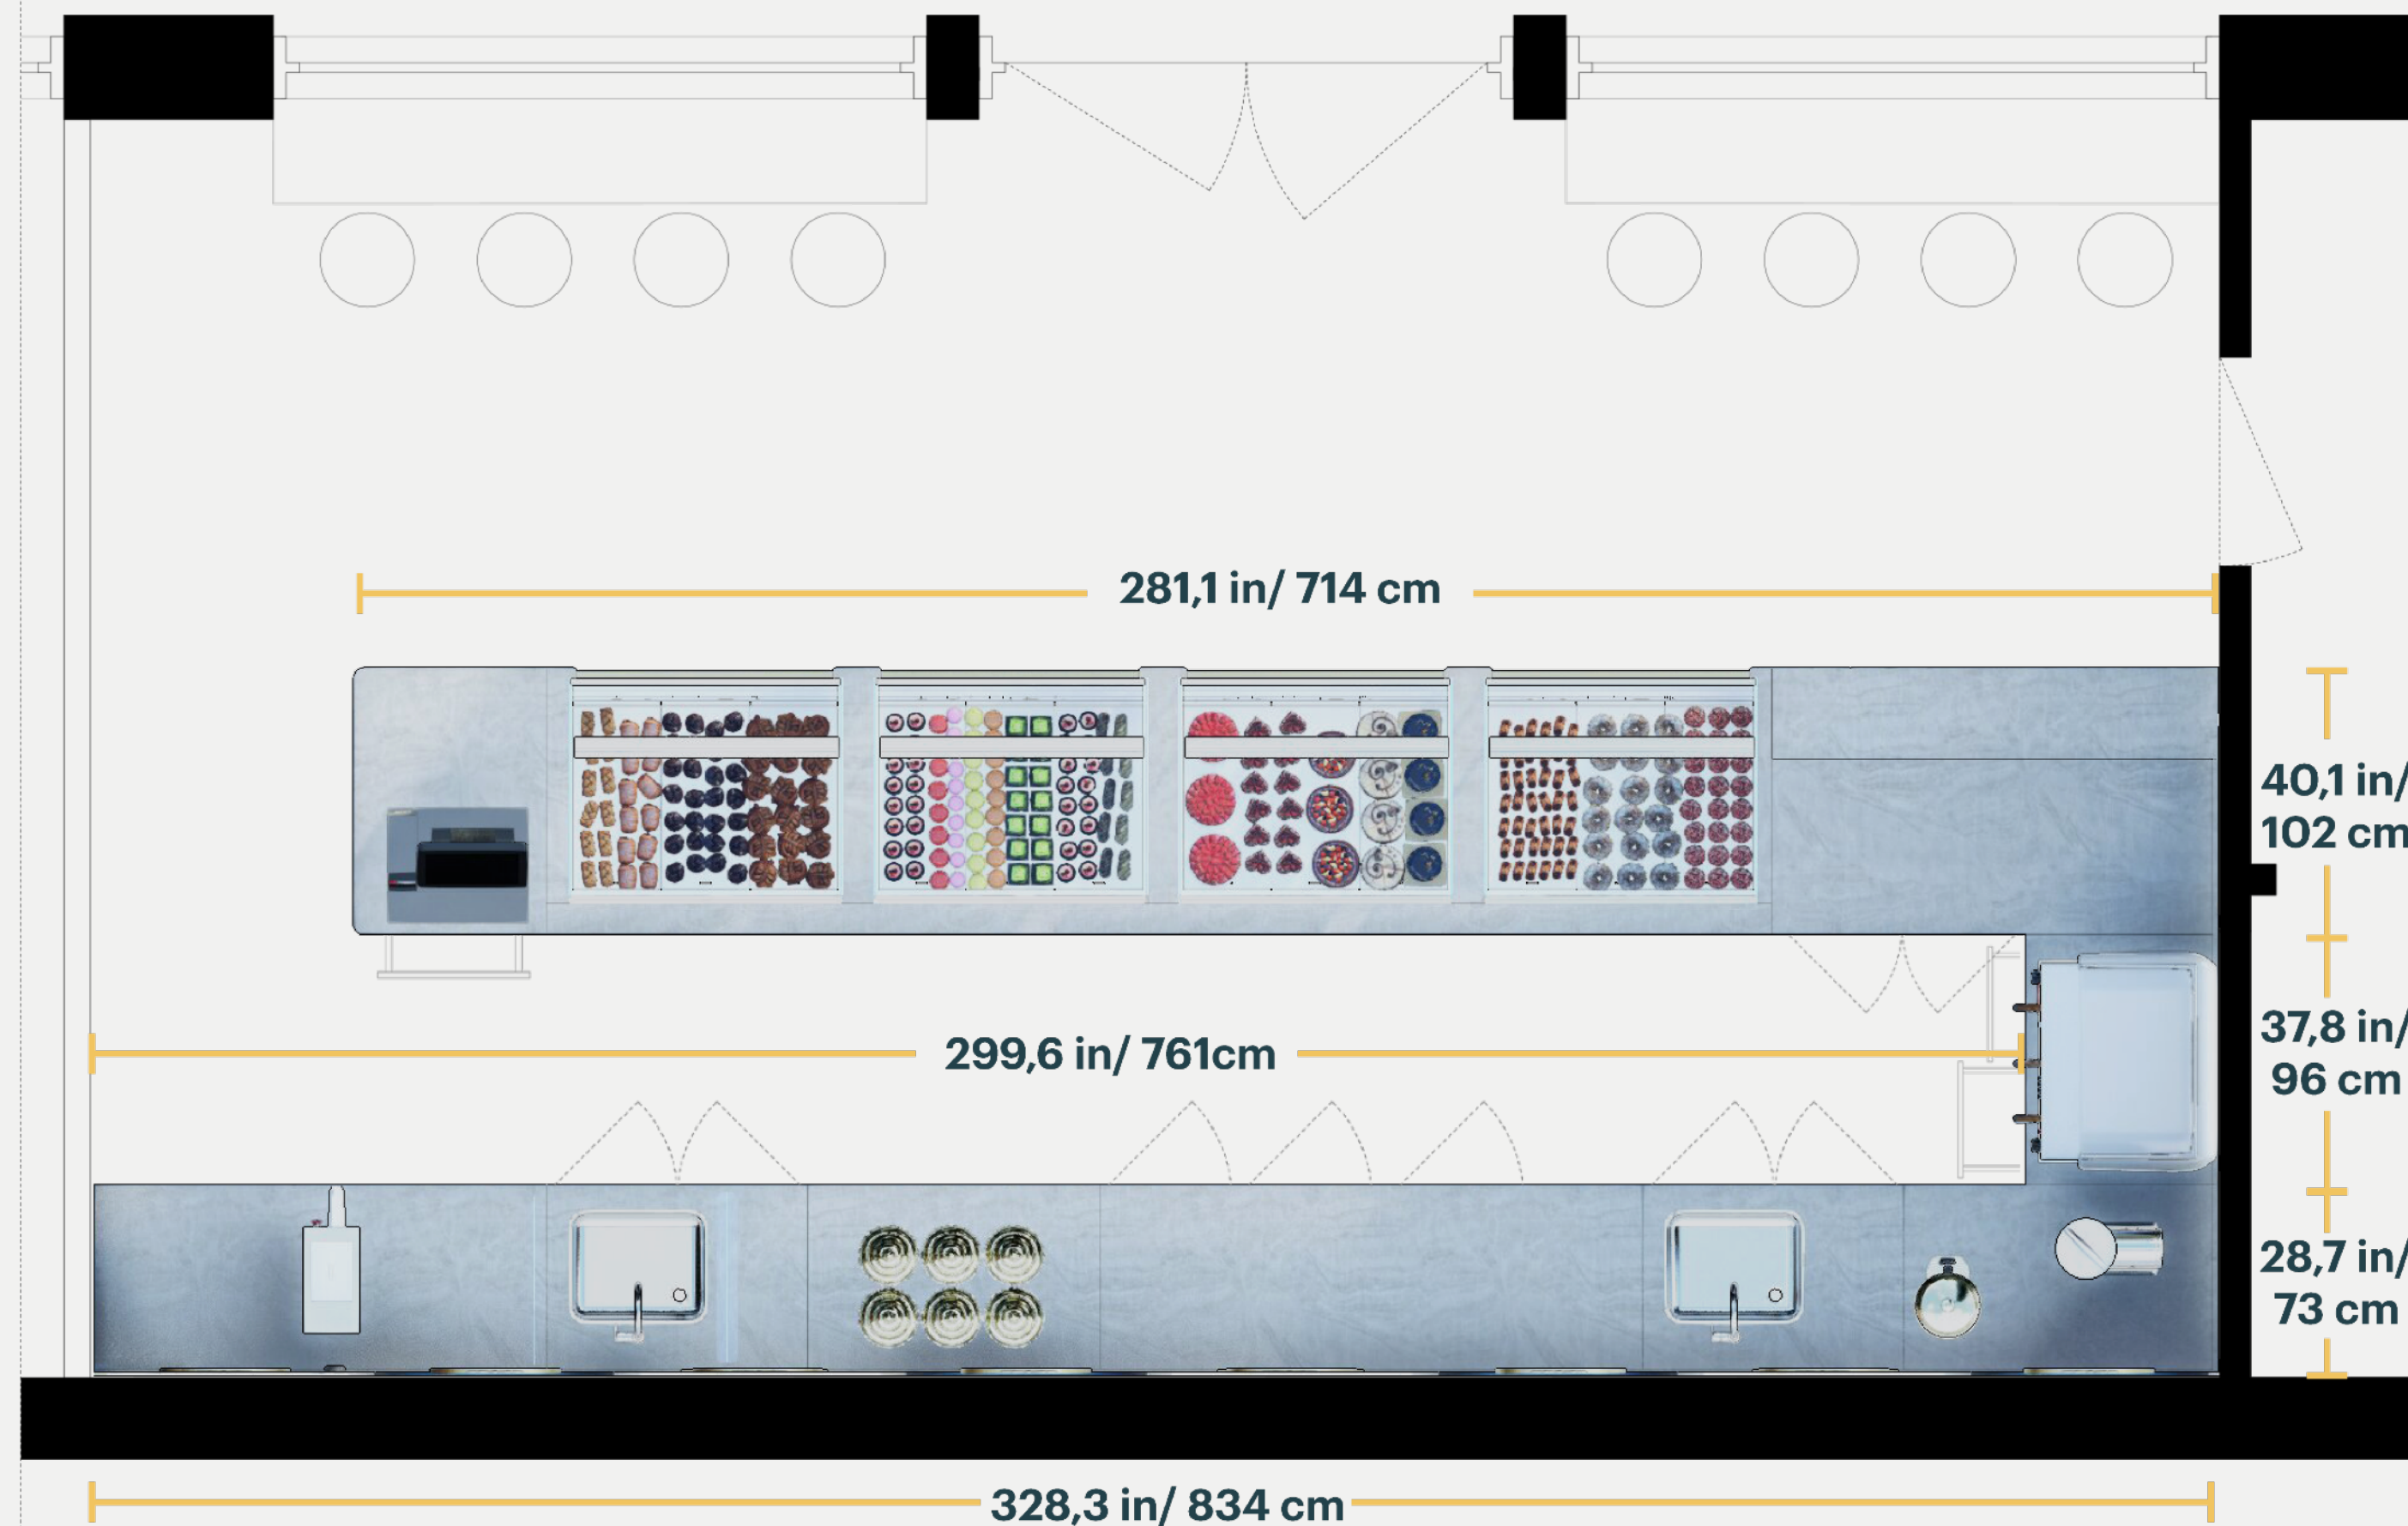

Conceived for the **high-traffic** conditions typical of a city-center pastry shop, the system ensures **speed of service, clear circulation flows**, and immediate access to products, supporting a dynamic and efficient experience consistent with the **grab-and-go concept**.

LAY-OUT

The layout in **430 sqf** is designed to seamlessly **integrate** the **pastry area** with the **coffee preparation zone**, creating a continuous and functional space that encourages interaction between display, service, and production. The arrangement of elements optimizes operational paths and **minimizes interference** between staff and customers.

FURNITURE LIST

Furniture list - front counters:

- 1-Checkout counter
- 2-Refrigerated Pastry Display case
- 3-Refrigerated Pastry Display case
- 4-Refrigerated Pastry Display case
- 5-Refrigerated Pastry Display case
- 6-Coffee counter with two doors refrigerated

Furniture list - back counters:

- 7-Back Coffee counter Coffee machine
- 8-Neutral Back counter
- 9-Back counter sink
- 10-Back counter Three doors refrigerated
- 11-Back Pozzetti Counter 6 flavors
- 12-Back counter sink
- 13-Neutral Back counter

1 - CHECKOUT COUNTER

- Stainless steel frame
- 1 Stainless steel drawer
- 1 Stainless steel shelves
- Front panels made galvanized steel
- Plinth coated made galvanized steel

The checkout counter, with a **fully stainless steel frame**, is designed to ensure efficiency and organization in any operational setting. Equipped with **large stainless steel drawers and shelf**, it offers a durable, hygienic, and functional solution for space management. The Silestone® Cosentino surface guarantees long-lasting performance and easy cleaning, while the **front panels**, made of powder-coated galvanized steel with **high-resistance finishes**, complete the structure by combining strength with essential aesthetics.

3M

DI-NOC™

3M™ DI-NOC™ Architectural E-Series PO Polyolefin Film are film surface finishes that give you a range of choices as you pursue your sustainability goals. These films are made with approximately 99.5% non-PVC (non-vinyl) materials, and do not contain more than 0.5% of a polyvinyl chloride-based component. **These finishes are available in various patterns and textures – wood, plaster, concrete and more, and are a great way to upgrade your interior look without all the disruption.** 3M™ Comply™ Adhesive technology virtually eliminates air bubbles, simplifying and speeding up the application process.
