

 SHOP SIZE- 60 SQM/645 SQF

PASTRY SHOP

This concept is imagined with a **dual soul**: on one hand, it responds to **urban dynamism**, while on the other, it **offers a refuge** from the frantic pace, allowing guests to fully savor the delicacy of artisanal pastries.

The counter immediately captures the eye of anyone who enters. A **true stage** dedicated to haute patisserie, meticulously designed **to frame** and **enhance** every single **artisanal creation**.

Its aesthetic is an ode to **timeless elegance**: a wide, curved structure presented in a sophisticated **dusty blue** hue, enriched by profiled **geometric moldings**. Crowning this scenic vision, a luxurious **black marble** top creates a bold and captivating contrast, transforming every mignon, slice of cake, and baked good into a **precious jewel**. It is the exact point where haste disappears, leaving room only for visual beauty and the **pleasure of tasting**.

Virtual Tour

MOODBOARD

The space exudes a feeling of great brightness, cleanliness, and a refined, welcoming atmosphere. The design skillfully combines **classic-inspired** lines with **modern details**, creating a sophisticated, fresh, and inviting environment. The absolute standout color is a soft and soothing powder blue, applied to the walls and the structure of the imposing curved counter. This delicate tone is embellished and warmed by luminous brass and gold details, visible in the baseboards, the paneled moldings, and the frames of the wall-mounted menus. The polished black marble chosen for the countertops offers a bold and luxurious contrast, which dialogues perfectly with the geometric rigor of the black and white checkerboard floor. Completing the scene are lightweight structures that do not visually weigh down the space. The white arched shelving displays the products with great delicacy and recalls classic shapes, while the suspended white globe chandeliers diffuse a soft light that enhances the pastel colors. Finally, the white-painted exposed brick wall on the right adds a subtle textural touch that gives depth to the entire room.

FLOOR PLAN

The undisputed protagonist of this refined space is the majestic counter, an imposing design structure that immediately catches the eye of anyone who enters. This central element is not merely a service surface, but a true stage dedicated to haute patisserie, custom-designed to frame and enhance every single artisanal creation.

Its soft and sinuous line, which sweeps through the room accompanying the customer with its elegant curvature, is entirely clad in a sophisticated shade of dusty blue. This delicate hue is strongly enhanced by the rigorous geometric moldings and the baseboard, both outlined in a luminous gold that gives the structure a luxurious retro charm. Creating a sharp and deep contrast is the countertop, crafted from a magnificent dark material, akin to polished black marble, which elegantly reflects the ambient lighting.

LAY-OUT

Beyond its aesthetic appeal, the venue's layout has been carefully designed to ensure a smooth and dynamic workflow. Customers immediately spot the checkout counter, strategically placed next to the three large pastry display cases. The design choice is to instantly highlight the sweet creations, declaring at first glance that haute patisserie is the true beating heart of the project. Moving further in, the large curve of the counter opens up spectacularly through wide glass surfaces, specifically designed to offer seated guests a privileged view of the extensive selection of breakfast and lunch items. This naturally defines a welcoming and distinct area for those who wish to pause and linger. To complete the picture, there is the back counter dedicated to the coffee station: strategically positioned, it ensures that even the act of preparing coffee becomes a true, visible ritual. This way, those comfortably seated at the tables can watch the fascinating gestures of the baristas, transforming a simple coffee break into a fully engaging, all-around sensory experience.

FURNITURE LIST

Furniture list - front counters:

- 1-Checkout counter
- 2-Refrigerated Pastry Display case
- 3-Refrigerated Pastry Display case
- 4-Refrigerated Pastry Display case
- 5-Front counter corner
- 6-Counter Two doors refrigerated

Furniture list - back counters:

- 7-Back Coffee counter Coffee machine
- 8-Glass washer cabinet
- 9-Back counter sink
- 10-Back counter Three doors refrigerated
- 11- Bin Cabinet

1 - CHECKOUT COUNTER

- Stainless steel frame
- 2 Stainless steel drawer
- 1 Stainless steel shelves
- Front panels made galvanized steel
- Plinth coated made galvanized steel

The checkout counter, with a **fully stainless steel frame**, is designed to ensure efficiency and organization in any operational setting. Equipped with **large stainless steel drawers and shelf**, it offers a durable, hygienic, and functional solution for space management. The Silestone® Cosentino surface guarantees long-lasting performance and easy cleaning, while the **front panels**, made of powder-coated galvanized steel with **high-resistance finishes**, complete the structure by combining strength with essential aesthetics.

3M

DI-NOC™

3M™ DI-NOC™ Architectural E-Series PO Polyolefin Film are film surface finishes that give you a range of choices as you pursue your sustainability goals. These films are made with approximately 99.5% non-PVC (non-vinyl) materials, and do not contain more than 0.5% of a polyvinyl chloride-based component. **These finishes are available in various patterns and textures – wood, plaster, concrete and more, and are a great way to upgrade your interior look without all the disruption.** 3M™ Comply™ Adhesive technology virtually eliminates air bubbles, simplifying and speeding up the application process.
