

 SHOP SIZE- 15 SQM/161 SQF

# COFFEE BAR

Within the dynamic airport **food court**, the retail unit stands out with a contemporary and highly **recognizable image**, built around a compact counter enriched by refined material details. The front, defined by an **elegant dark marble** effect with light veining, interacts with **light wood slatted surfaces**, creating a visual balance between **solidity and warmth**. The project clearly expresses the typical chromatic codes of **contemporary coffee shops**, reinterpreted through a carefully balanced mix of natural materials and more distinctive accents. The warm tones of the wood, used in the counter cladding, immediately evoke a sense of familiarity and authenticity, recalling the **artisanal tradition** associated with the world of coffee.

## MOODBOARD

**Black marble with white veining dominates the work surfaces, conveying an industrial elegance. The black porcelain stoneware wall cladding in a herringbone pattern creates depth and movement, while the exposed brick on the side wall introduces a raw and authentic touch. The light wood front panels of the counter (ash or bleached oak) balance the harshness of the dark palette with warmth and naturalness.**

**RAL 9005**

## FLOOR PLAN

The “Coffee To Go” layout is designed to ensure efficiency throughout different times of the day, optimizing workflow and operations. The arrangement highlights the core business of the space: the coffee machine, positioned frontally, becomes the focal point and showcases the barista’s gestures, enhancing the experience and reinforcing the perception of quality. and the use of marble with visible chips, a material that helps evoke retro atmospheres with a touch of sophistication.

## LAY-OUT

In just 15sqm/160 sqf, this Caffetteria “To Go” format transforms a compact space into an efficient and high-performing system, designed for fast, high-quality service. The linear counter concentrates all essential functions, while the front-facing coffee machine becomes both the visual and operational focal point. The back-of-house areas, though minimal, are well organized to ensure smooth, interference-free movements, optimizing workflow and enhancing service speed.

## FURNITURE LIST

# 3M

# DI-NOC™

**3M™ DI-NOC™ Architectural** E-Series PO Polyolefin Film are film surface finishes that give you a range of choices as you pursue your sustainability goals. These films are made with approximately 99.5% non-PVC (non-vinyl) materials, and do not contain more than 0.5% of a polyvinyl chloride-based component. **These finishes are available in various patterns and textures – wood, plaster, concrete and more, and are a great way to upgrade your interior look without all the disruption.** 3M™ Comply™ Adhesive technology virtually eliminates air bubbles, simplifying and speeding up the application process.
