

 SHOP SIZE- 80 SQM/861 SQF

COFFEE BAR

The project is conceived as a **coffee shop to be experienced**, designed for studying, working, or simply **spending time in a warm and familiar environment**. The **industrial identity**, expressed through exposed brick, black metal, and suspended lighting, is combined with wood, textiles, and soft furnishings that make the space welcoming and comfortable. **The counter is the central element**, conceived as the architectural focal point of the space: its curved shape guides circulation and visually connects the different areas. Wood adds warmth, while the dark marble enhances its contemporary character. **The mouldings incorporated into the counter and furnishings introduce a more classic and elegant detail**, creating a balance between the **industrial character** and a more refined, **familiar atmosphere**. The counter thus becomes the **heart and meeting point of the entire project**.

VIRTUAL TOUR

Discover our virtual environments: **explore in 3D the spaces designed for you**, experience immersive engagement, and make confident decisions. **Find the right inspiration** to create a tailor-made, innovative, and unique venue.

Virtual Tour

MOODBOARD

Contemporary **industrial-chic** style, featuring soft lines and classic cream-colored mouldings, combined with **warm oak** and a **black veined marble countertop**. The contrast between elegant materials, dark tiles, and metallic details creates a sophisticated yet casual atmosphere with a distinctly urban, New York-inspired character.

The counter features **warm taupe mouldings** and a **decorative panel that conceals the coffee machine**, keeping the equipment discreetly integrated into the design. It is set against a wall clad in **glossy dark-green tiles**, creating a rich and sophisticated backdrop. The space is brought to life by the presence of **plants and botanical elements**, adding freshness and a natural touch to the urban, contemporary atmosphere.

FLOOR PLAN

The layout is designed to be **intuitive** and **fluid**, guiding customers along a **natural path** from the entrance to the counter. The linear arrangement optimizes space and streamlines operations, clearly separating **service**, **display**, and **preparation areas**. The counter becomes both the **visual and functional focal point**, while the back area is organized to ensure operational efficiency without compromising aesthetics.

The result is a clean and welcoming environment where functionality and usability integrate seamlessly.

FURNITURE LIST

Furniture list - front counters:

- 1-Refrigerated Grab & Go Display case
- 1A-Display case
- 2-Checkout counter
- 3-Front Counter 2 Doors Refrigerated
+Front Counter Coffee Machine
- 4-Front Counter Corner
- 5-Front counter connection

3M

DI-NOC™

3M™ DI-NOC™ Architectural E-Series PO Polyolefin Film are film surface finishes that give you a range of choices as you pursue your sustainability goals. These films are made with approximately 99.5% non-PVC (non-vinyl) materials, and do not contain more than 0.5% of a polyvinyl chloride-based component. **These finishes are available in various patterns and textures – wood, plaster, concrete and more, and are a great way to upgrade your interior look without all the disruption.** 3M™ Comply™ Adhesive technology virtually eliminates air bubbles, simplifying and speeding up the application process.
